

9 Courses

- Develop Generative AI Applications: Get Started
- Build RAG Applications: Get Started
- Vector Databases for RAG: An Introduction
- Advanced RAG with Vector Databases and Retrievers
- Build Multimodal Generative AI Applications
- Fundamentals of Building AI Agents
- Agentic AI with LangChain and LangGraph
- Agentic AI with LangGraph, CrewAI, AutoGen and BeeAI
- Build AI Agents using MCP

Feb 17, 2026

Antonio Cangiano
Director, IBM Skills Network

RAJ SHANKAR

has successfully completed the online Professional Certificate

IBM RAG and Agentic AI

The certificate holder is proficient in building advanced generative AI applications using RAG, agentic, and multimodal AI technologies. They understand the core concepts and real-world applications of generative AI and agent frameworks. They can design effective prompts, implement function calling, and use tools like LangChain to orchestrate complex reasoning workflows. They can build autonomous and collaborative agents that use memory, feedback, and chaining to solve structured and unstructured problems. They are able to integrate APIs, tools, and multi-step reasoning to create flexible, self-improving systems. They can design multi-agent architectures using frameworks like CrewAI and LangGraph, enabling distributed decision-making, and dynamic context switching.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
